React Native

Ant Design

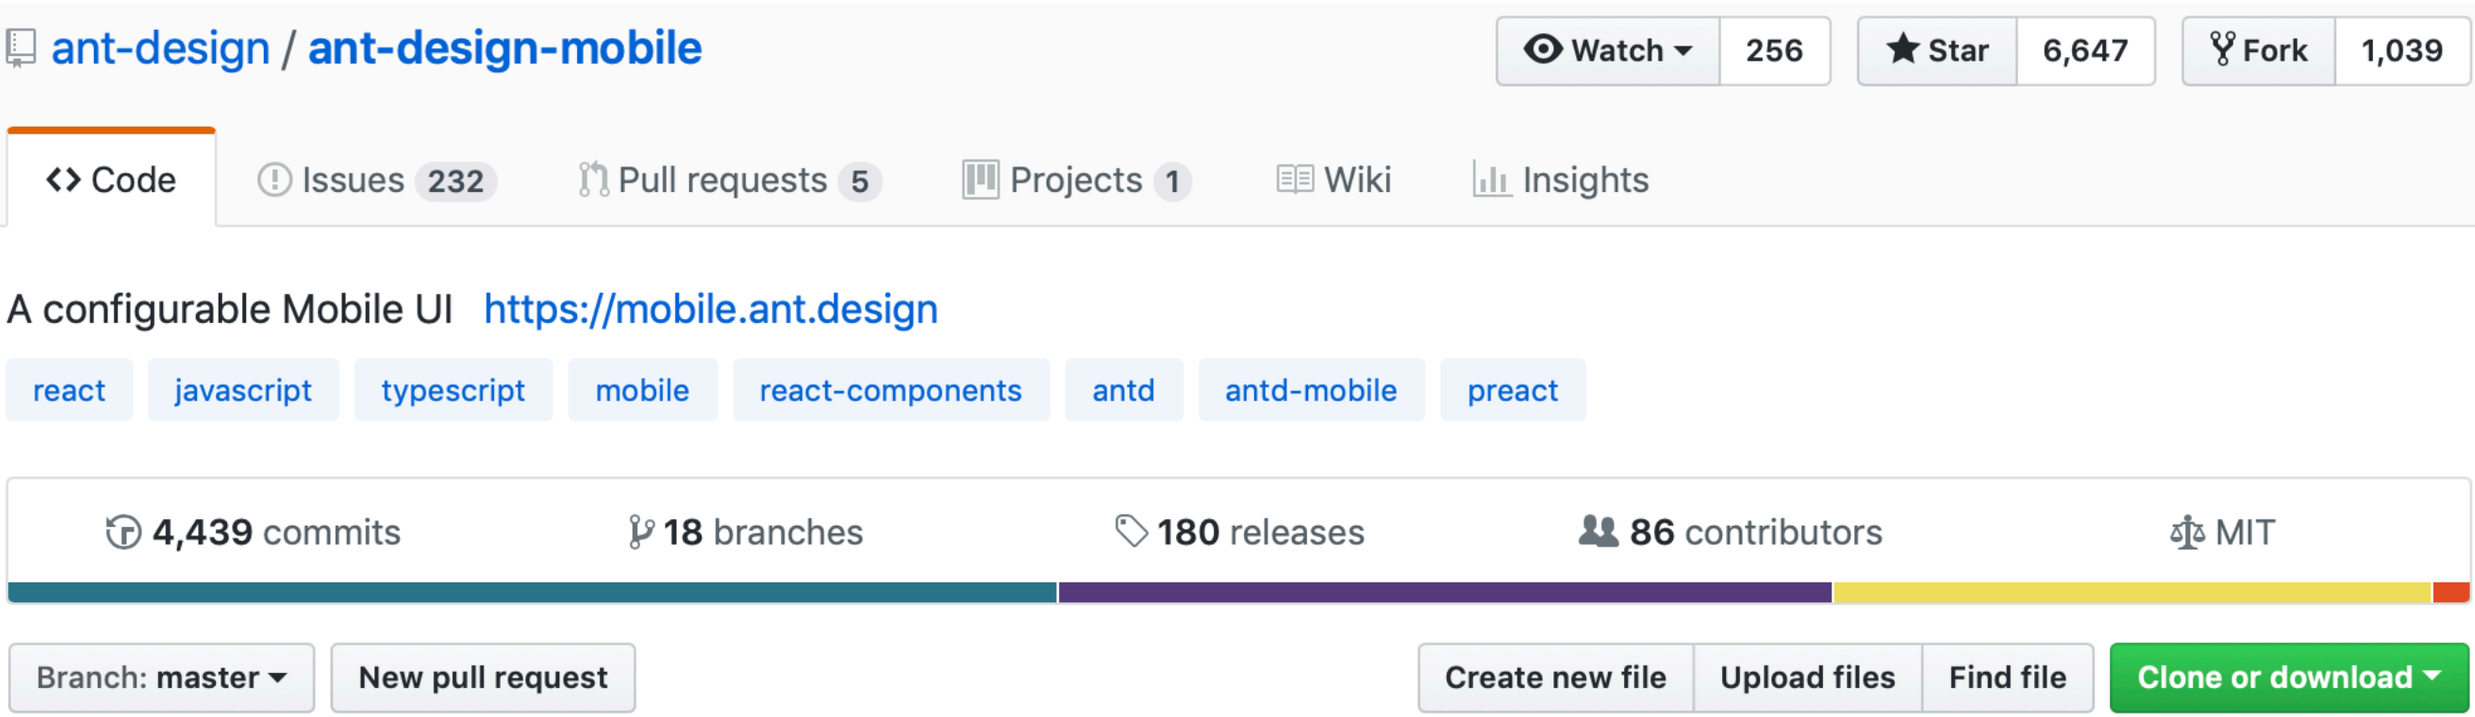
написан на **TypeScript,**
стилизован с помощью **Less**

3 versions

- antd
- antd-mobile
- antd-mobile-rn

Нативный или нет?

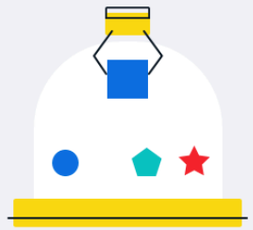
Ant Design Mobile



Understand what you need

Rich Components | Full Featured

Provides 40+ basic components, covering all kinds of scenarios, component features rich to meet the needs of various functional Requirements.



One Step To Get Start | Loaded on demand

Simple enough to get started, you can load all the code at a time or only load some of the components used in the code to avoid redundancy.

Small Size | Outstanding Performance

On the basis of not losing the features, as far as possible to ensure a single component of the smallest, best performance.

Easy To Customize | Many Styles

Support flexible style customization, easy to generate a variety of styles to meet the needs of personalized products.

Если у вас Mac и установлен Sketch,

то можно даже скачать **Sketch UI Kit**,

который заметно облегчит работу

дизайнера при построении

интерфейса экранов

Кастомизация и локализация (компонентов)

```
import enUS from '@ant-design/react-native/lib/locale-provider/en_US';

...

return <Provider locale={enUS}><App /></Provider>;
```

Change Log

`@ant-design/react-native` strictly follows Semantic Versioning 2.0.0.

Release Schedule

- Weekly release: patch version at the end of every week for routine bugfix (anytime for urgent bugfix).
- Monthly release: minor version at the end of every month for new features.
- Major version release is not included in this schedule for breadking change and new features.

3.1.3

`2019-02-19`

- Fixes `babel-runtime/helpers/extends` not found after using `babel-plugin-import` #346
- Fixes `drawer` component of `ios`. When returning, there will be a short stay on the page #344

3.1.1

`2019-01-30`

Happy Chinese New Year

- `popover` adds the `placement` property to support configuration of different positions `'top | right | bottom | left | auto'` #308

3.1.0

`2019-01-27`

- Refactor `popover` #298
  - Removed the (`overlayStyle` `contextStyle` `name` `openMenu / closeMenu / toggleMenu` `style`) property. The refactored version supports multiple Popovers.
